

# Supreme Bot Firefox Tutorial:

Before the bot will run, you will need two things:

1. The most recent version of Java which can be downloaded here:

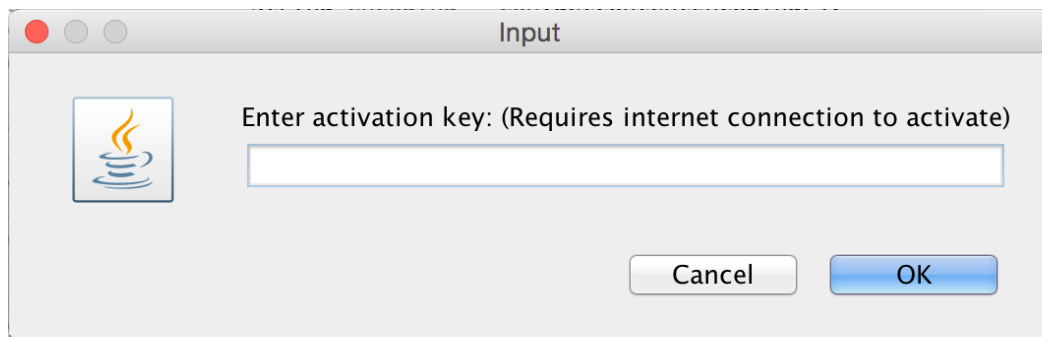

<https://java.com/en/download/>

2. Mozilla Firefox 34:

Mozilla Firefox 34 comes with the bot, so no download is required. **However, for Windows/Linux users only**, be sure the folder “firefox” is in the same folder of the Supreme Shark Bot .jar file when you run the bot, otherwise it won't be able to find Firefox and **the Firefox window will never open**. Additionally, Windows/Linux users, be sure to extract the “firefox” folder and all of its contents when initially downloading the bot.

## Activation:

1. Upon first running the bot you will see this prompt:

Enter the activation key which was sent to you and make sure you are connected to the internet. This key will only work once, so be careful to only activate on the computer you plan on using the bot with.

2. Once activated you will never be prompted with this again, even after updating the bot.

## Usage:

## 1. Item Info Fill Out:

**Supreme Bot**

### ITEM INFO

Item 1 | Item 2 | Item 3

Enter keywords of the item, with no spaces. Try and choose keywords exclusive to the desired item.

**Keyword 1:** REQUIRED FIELD

**Keyword 2:** REQUIRED FIELD

**Keyword 3:** CAN BE LEFT AS IS

**Item Category:** [Dropdown]

What color is the item? Be sure to enter the color as it will be listed on Supreme's site. If the color is two words enter only one of the words. If you are unsure of the exact color of the item or the item has no color, check the box below and leave the color field as is.

**Color:** CAN BE LEFT AS IS

☐ **Unsure of Color**

What is the size? Type it exactly as you'd see it on the site. If there's no size, leave this field AS IS. (Example: For a medium, type 'medium', for a 10 and a half, type '10.5')

**Size:** CAN BE LEFT AS IS

☒ **Add this Item?**  
(If not checked, this item won't be purchased or added to cart)

### CHECKOUT INFO

**Load Checkout Info**  
(Use previously saved Checkout Info)

**Name (On Credit Card):** REQUIRED FIELD

**Email:** REQUIRED FIELD

**Phone:** REQUIRED FIELD

**Street Address:** REQUIRED FIELD

**Zip Code:** REQUIRED FIELD

**City Name:** REQUIRED FIELD

**State Abbreviation (2 letters):** REQUIRED FIELD

**Country:** [Dropdown]

**Credit Card Provider:** [Dropdown]

**Credit Card Number:** REQUIRED FIELD

**Expiration Month:** [Dropdown]

**Expiration Year (4 digits):** REQUIRED FIELD

**CVV:** REQUIRED FIELD

How often should the bot refresh Supreme (in milliseconds)? Enter a number 200-8000 for best results. (200 would be one refresh every fifth of a second, 8000 would be one refresh every eight seconds)

**Refresh Rate:** 1000

☒ **Auto Process Payment**  
(If not checked, you'll have to manually complete the checkout)

☒ **Disable Images**  
(Checking this will speed up the bot tremendously)

**Save and Continue**  
(Review info and enable bot)

- Supreme Shark Bot allows you to checkout with up to 3 items. It by default is only getting one item, to get 2 or 3 check 'Add this Item' on the Item 2 and/or Item 3 panel. **If you want more than one of the same item, read the multiple instances section under additional features**
- Keywords: Enter keywords of the item in the three keyword fields. In each field only one word should be entered, containing no spaces
- Item Category: Choose the category of the item, as listed on the site. (Item names and categories can be found [here](#))
- Color: As you may have noticed, Supreme doesn't put the color of the item in their preview on their site, so although they may show a picture of a shirt in blue, for example, they could potentially list it as navy or royal or blue or aqua on the site, and you won't know until the release. If you are sure of the color, you may enter it in the color field. If not, the 'Unsure of Color' feature has 3 measures to counteract this

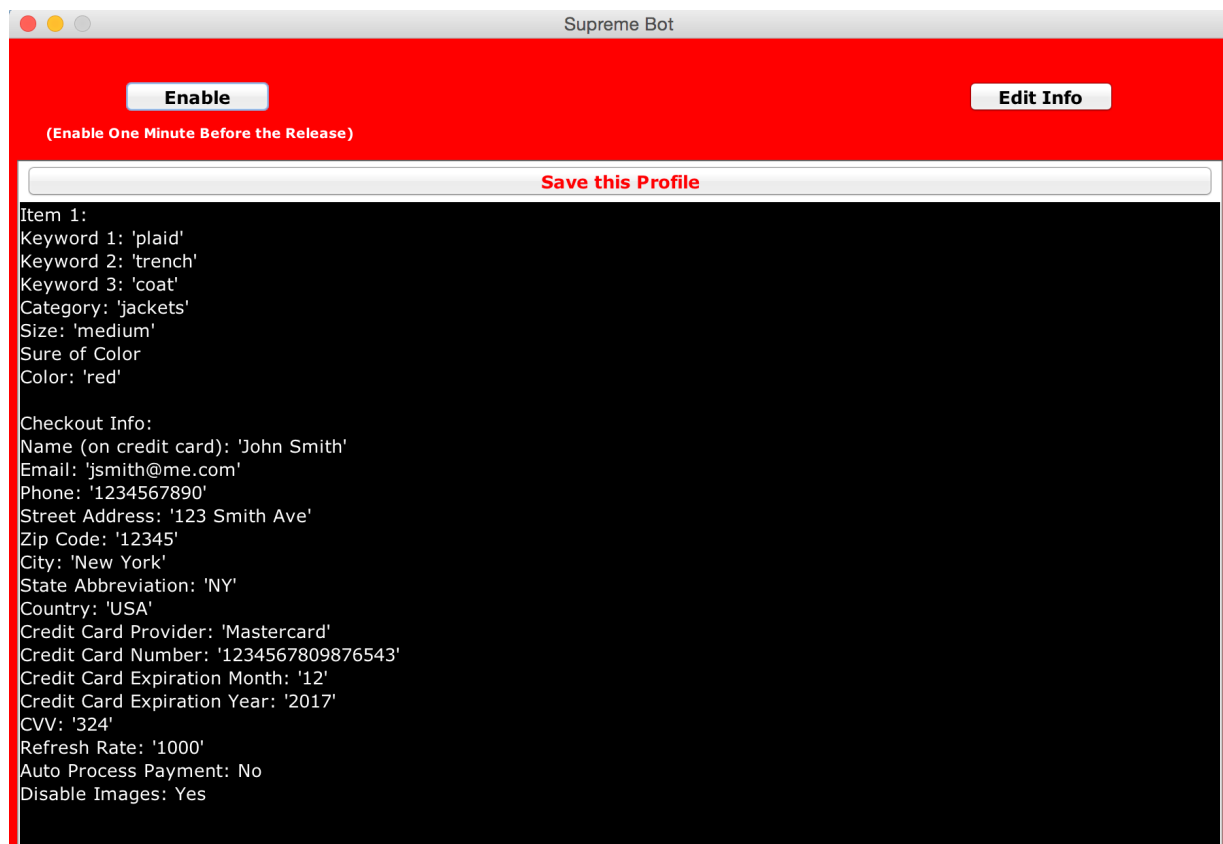

issue. This feature is explained further down in the tutorial, under the additional features category

- Size: Enter the size of the item. For clothing sizes should be spelled out (small, medium, large) and for shoes they should be numbers (9, 9.5, 10)

## 2. Checkout Info Fill Out:

- First Use: When you first use the bot, you'll have to fill out every field of the checkout info, just like you would on the Supreme Site. On your first use ignore the 'Load Checkout Info' Button
  - Address/Payment Info: Fill in your address/payment info as you typically would
  - Refresh Rate: This is how often the bot will refresh Supreme's site while waiting for the item to be posted. This field is in milliseconds, not seconds. For best results, choose a number from 300 to 500 (3/10 of a second to 1/2 a second)
  - Auto Process Payment: Check this if you want the bot to complete checkout 100% automatically, meaning it will place your order for you by pressing 'Process Payment'. If you want to manually complete the checkout, don't select this box, and the bot will not click 'Process Payment', you will have to do it manually
  - Disable Images: Check this box to Disable Images (Firefox 34 only). We highly recommend this feature in order to speed up the checkout
- Subsequent Uses: Click 'Load Saved Checkout Info' and then select your previously saved checkout info file from wherever you have it saved

## 3. Info Review and Enabling:

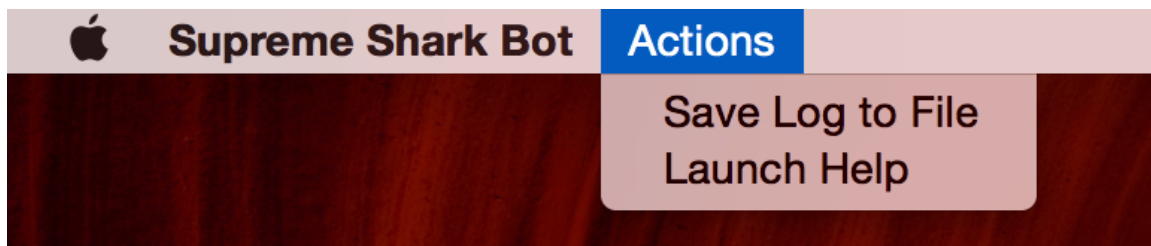

The screenshot shows a window titled "Supreme Bot" with a red header. In the header, there are two buttons: "Enable" and "Edit Info". Below the header, a message reads "(Enable One Minute Before the Release)". A white bar with the text "Save this Profile" is visible. The main area has a black background with white text listing configuration details:

Item 1:  
Keyword 1: 'plaid'  
Keyword 2: 'trench'  
Keyword 3: 'coat'  
Category: 'jackets'  
Size: 'medium'  
Sure of Color  
Color: 'red'

Checkout Info:  
Name (on credit card): 'John Smith'  
Email: 'jsmith@me.com'  
Phone: '1234567890'  
Street Address: '123 Smith Ave'  
Zip Code: '12345'  
City: 'New York'  
State Abbreviation: 'NY'  
Country: 'USA'  
Credit Card Provider: 'Mastercard'  
Credit Card Number: '1234567809876543'  
Credit Card Expiration Month: '12'  
Credit Card Expiration Year: '2017'  
CVV: '324'  
Refresh Rate: '1000'  
Auto Process Payment: No  
Disable Images: Yes

- Review your checkout info and item info, making sure everything is correct. If there are any errors, click the 'Edit Info' button to go back and change things, then click the 'Save and Continue' Button to return
- Save this Profile (Only needed for first use or if you have entered new checkout info): Once you have confirmed that all of the info is correct, click the 'Save this Profile' button and then choose a place to save your Checkout Info File to, along with a name for the file. Don't delete the file or lose it because in subsequent uses of the bot you can choose 'Load Saved Checkout Info' and your previously saved Checkout Info File, instead of having to fill out your address, payment info, refresh rate, auto process payment choice and disable images choice all over again
- Enable: Click the 'Enable' button one minute before the release. You will see a Firefox Window open on the Supreme Home Page, which will take about 1-2 seconds to do. Then the bot will begin scanning the page for your item/items and if not found, it will refresh the page and scan again. This process will repeat until the item is found, at which point checkout will occur. **It is very important** that you have the bot window either visible or directly behind the Firefox Window, so that if the bot needs to prompt you to decide between multiple items, the prompt is visible to you. Read the Disambiguation Section under additional features to learn more about these prompts
  - Abort: Once the bot is enabled, an 'Abort' button will appear where the 'Edit Info' button previously was. If for any reason you need to cancel the checkout of the bot, you can click this button in order to stop the checkout. It is a better idea to click abort than to close the Firefox Window, because aborting doesn't close the Firefox Window, so after clicking 'Abort' you could continue the checkout manually, picking up from where the bot left off

- Save Log to File: As the bot works, it prints a log of everything it is doing to the black window pane below the 'Save this Profile' button. If you need to save this log after running the bot, be it to brag about how easily it checked out or to email to [team@supremesharkbot.com](mailto:team@supremesharkbot.com) asking what went wrong or reporting an error, go to the 'Actions' Menu in the tool bar and the click 'Save Log to File'. Then choose a location and a name for the file, and click 'Save'

## Additional Features:

1. Unsure of Color:

Unsure of Color

In the incorrect colors column, fill in colors which you don't want. Then in the potential colors column, enter the colors which might be the right one for the item. (For example, if you wanted the box logo in the flag color but you didn't know it was going to be listed as "flag", in the unsure column you'd put red, black, white, grey, blue, navy, scarlet, indigo... In the potential, you'd put stars, stripes, america, flag, patriotic... The more colors you put under unsure, the more the bot can rule out. The more you put under potential, the better chance you'll put the color as it will be listed on the site, leading to the bot finding it.) If the item has no color, (Certain Accessories such as ashtrays are often listed on the site with no color) check the 'Item 1 has no Color' checkbox and then click 'Apply and Exit'.

☐ Item 1 Has No Color

**Incorrect Colors:**

Item 1   Item 2   Item 3

CAN BE LEFT AS IS
CAN BE LEFT AS IS
CAN BE LEFT AS IS
CAN BE LEFT AS IS
CAN BE LEFT AS IS

- As you may have noticed, Supreme doesn't put the color of the item in their preview on their site, so although they may show a picture of a shirt in blue, for example, they could potentially list it as navy or royal or blue or aqua on the site, and you won't know until the release. 'Unsure of Color' is a way of ensuring the bot will purchase the proper item, even if you're unsure of the color. To enable this feature, check 'Unsure of Color' on the home page of the bot on the panel/panels of the item/items which require the 'Unsure of Color' feature
- Item \_ Has No Color: If the item will be listed on Supreme's Site without a color, which usually only happens with accessories that only come in one color (i.e. ashtrays, clocks, keychains), check the 'Item \_ Has No Color' box and then leave the 'Incorrect Colors' and 'Potential Colors' as they are
- Incorrect Colors: Enter colors which the item you want to get comes in, but aren't the color you want, in this field. For example if you wanted a shirt that came in a bluish color, a purplish color and a pinkish color in the bluish color, you'd fill out pink, purple, red, violet, indigo, salmon, rose, lavender and any other ways you could think to describe pink and purple in the 'Incorrect Colors' fields. Each of the 'Incorrect Colors' boxes should contain only a one word color, with no spaces. They do not all

have to be filled out, but the more you fill out, the better chance you have of getting the colors right

- **Potential Colors:** Enter colors which the item you want to get comes in, and are the color you look to get, in this field. For example if you wanted a shirt that came in a bluish color, a purplish color and a pinkish color in the bluish color, you'd fill out blue, navy, turquoise, royal, teal, ultramarine and any other ways you could think to describe blue in the 'Potential Colors' fields. Each of the 'Potential Colors' boxes should contain only a one word color, with no spaces. They do not all have to be filled out, but the more you fill out, the better chance you have of getting the color right
- **Apply and Exit:** Click the 'Apply and Exit' button to save what you have filled out and exit the Unsure of Color Window.
- **Cancel:** Click the 'Cancel' button to disable 'Unsure of Color'. This will uncheck the 'Unsure of Color' box on the home page and discard any info you may have filled out
- **When running the bot with Unsure of Color enabled,** there is a chance that you may not have entered enough colors for the bot to rule out all of them except for one, and for this reason it may prompt you with a disambiguation prompt asking which item is correct. Read the section below to learn more

## 2. Disambiguation:

- When the bot is trying to find your item and finds multiple items that fit the info you entered, it will prompt you asking which is correct. This occurs usually when 'Unsure of Color' is enabled and the bot either found multiple items that fit the potential colors entered or when it found no items that fit the potential colors entered, but it did find items fitting your keywords. In the event that one of these two instances

occurs, the bot will minimize Firefox and prompt you asking which item is correct, listing all of the items which could be correct. **Answer this as quickly as possible!!!** The bot cannot proceed until this is answered. So, if you enabled 'Unsure of Color' for one of more of your items, be on the lookout for this prompt, seeing as it could come up. **However, is some rare instances, you could receive this prompt with having enabled 'Unsure of Color'.** If you entered keywords which fit multiple items, the bot could prompt you asking which item is correct. This would only occur if you entered unspecific item keywords, such as 'supreme', 'shirt', 'sweatpants' or anything that could pertain to multiple items. **Because of this possibility, you should always be at your computer while the bot is running, just in case you receive this prompt.** Have only Firefox and the bot open so that another window doesn't block the prompt, and have the bot window right behind the Firefox window so that when Firefox is minimized the prompt is readily apparent

### 3. Multiple Instances

- For limited drops Supreme won't allow more than one of any given item per customer. In order to counteract this, you can run a new instance of Supreme Shark Bot and use a different checkout profile with it (which has different credit card information), in order to get the same item twice.
  - **Windows/ Linux:** Double click the Supreme Shark Bot .jar file **while holding the shift key** multiple times, opening as many instances of the bot as the number of pairs of the item you need (If you want 3 pairs of something, open 3 instances of the bot). Give each instance of the software a different checkout profile **with different credit card information**, and then fill out the info for the item as needed. When the drop comes, be sure to enable every instance of the bot.
  - **Mac:** To open multiple instances of the bot, download the file located [here](#). Unzip the file and put it in the folder containing Supreme Shark Bot (most likely your applications folder). Double click the "supremeSharkBotNewInstance" file multiple times, opening as many instances of the bot as the number of pairs of the item you need (If you want 3 pairs of something, open 3 instances of the bot). Give each instance of the software a different checkout profile **with different credit card information**, and then fill out the info for the item as needed. When the drop comes, be sure to enable every instance of the bot.
